

## 2017 Vegetable Buying Club

---

Join Andy's Specialty Garlic & Produce Summer CSA and receive some of the best tasting vegetables around! We are a small family run farm with a commitment to feeding people good food through sustainable, nutrient dense growing practices.

Here's how our Vegetable Buying Club works: you prepay at the beginning of the season, and then pick up at our market location or at the farm. You choose what vegetables you want, and the cost is deducted from your account. You save 10% off retail price, and also help our farm financially by committing to us for a season. If you are unable to pick up that week, that's not a problem. You shop for what you want when you want. Your credit just needs to be used before the end of the year.

We are Certified Organic and maintain the fertility of our sandy loam soils through cover cropping, crop rotation, mulches, compost, and bagged organic fertilizers. Healthy soils produce better tasting and more nutritious vegetables. We accomplish pest control through row covering susceptible crops.

Please make our farm part of your real food adventure. We have the best, freshest, and most nutrient dense Certified Organic vegetables you can find anywhere!
